

## AMENDMENTS TO CLAIMS

1. (original) A surface covering comprising a substrate and a top coating characterised in that the top coating comprises particles with a conductive coating having a mean size between 0.1 and 50 :m.
2. (original) The surface covering according to claim 1, wherein the particles are substantially spherical.
3. (currently amended) The surface covering according to claim 1 ~~or 2~~, wherein the particles comprise a coating of silver, aluminum, copper, nickel, gold or an alloy thereof with another ~~metals~~ metal.
4. (currently amended) The surface covering according to ~~any of the preceding claims~~ claim 1, wherein the particles have a dry bulk resistivity of between 0.0001 and 0.01 Ohms/cm.
5. (currently amended) The surface covering according to ~~any of the preceding claims~~ claim 1, wherein the top coating comprises between 0.01 and 10% w/w of particles based on the weight of the top coating.
6. (currently amended) The surface covering according to ~~any of the preceding claims~~ claim 1, wherein the top coating comprises a PU-dispersion, a PU-solution, a 2-components PU, a PU acrylate, an epoxy acrylate, a polyester acrylate, a polyether acrylate, a silicone acrylate or a mixture thereof.
7. (currently amended) The surface covering of claim 5, wherein the coating comprises an urethane derived polymer ~~preferably polyurethane~~.
8. (currently amended) The surface covering of claim 5, wherein the coating comprises a water based UV-curable PU-acrylate dispersion with a dry content of between 5 %

and 80% w/w, ~~preferably between 20 and 60 % w/w.~~

9. (currently amended) The surface covering according to ~~any of the preceding claims~~  
claim 1, wherein the top coating has a thickness of between 0.5 :m to 100 :m.

10. (currently amended) The surface covering according to ~~any of the preceding claims~~  
claim 1, wherein the substrate is a conductive and antistatic flooring.

11. (currently amended) The surface covering according to ~~any of the preceding claims~~  
claim 1, wherein the substrate is a PVC, polyolefin or rubber based flooring with vertical  
conductive channels.

12. (new) The surface covering of claim 7, wherein the polymer is polyurethane.

13. (new) The surface covering of claim 8, wherein the dry content is between 20 and  
60 % w/w.
